

STRING REINFORCED POLY

Eagle string reinforced poly sheeting is made from high strength polyethylene film manufactured with a tear resistant internal scrim reinforcement. Reinforced poly is used for various applications including construction enclosures, temporary containment, abatement covers, ground covers and underlayment. Poly sheeting may be installed vertically using scaffold wind clips, bungee ties, tie wire, wood-furring strips or fastening directly to a building or structure. All Eagle reinforced poly sheeting is tested and approved to meet today's industrial and construction standards.

TEMPORARY POLY ENCLOSURE

String Reinforced Poly

SP Series | Square Scrim Pattern Reinforced Poly Sheeting

FEATURES:

- High strength polyethylene film
- Square pattern tear resistant reinforced scrim
- Mil Thickness: 6 MIL
- Weather resistant reinforced poly
- Mold & mildew resistant plastic
- Remains flexible in cold weather climates
- Clear, Non-Flame Retardant (NON-FR)

BENEFITS:

- Creates temporary walls & covers
- Creates a temporary weather enclosure
- Provides a containment for dust & debris
- Increases temporary heating efficiency
- Material is flexible, easy to handle & easy to install
- Durable and reusable
- Handles well in low temperatures
- Allows sunlight through
- Helps contain dust, debris and airborne particulates during construction

Offer Good Through 12/31/22
