

CMI Program

Customer Managed Inventory

Are you still managing a tool cabinet with pen and paper or a clunky spreadsheet? Do you hate the time it takes to call in or email your order? The new Mars CMI ~ Customer Managed Inventory Program can help solve these problems.

What Mars Supply Provides

An iPad to access the website

Bluetooth scanner for quick part number entry

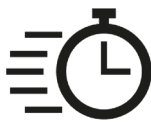

Tool Cabinet ~ see requirements on page 2

Training and Instructional Documents

Benefits of the Mars Supply CMI Program

Fast Implementation

Alternative Solution to Vending Machines

Streamlined Efficient Ordering

Same-Day Shipping *

All Equipment provided by Mars Supply

* Must be located in our same-day zone and order placed by certain time

What We Require from our Customers

The only thing we require from you is that there is an internet connection where the ordering will be done. It is that simple!

Testimonials

"Wanted to thank you for coming out and getting me set up on the scanner and with all the labels. I was able to place my end mill labels in the drawer in a way that I like and I just placed my first order on the iPad. Smooth as silk! Thanks again for helping me out and improving my process!!"

"Mars built a new bar code scanning system to fit our needs. Their new iPad fits comfortably in your hand while using the scanner to scan barcodes. I can then easily look at the item on the iPad and enter correct quantity which was something I could not do before. I then proceed to my checkout and order is sent to my Supervisor for approval. We use a blanket P.O. and are billed on one combined invoice at the end of each month."

Interested in the Mars Supply CMI Program?

Here's How To Get Started!

- Talk to your sales rep and arrange a demo. If you like the demo, we can move forward with the following steps.
- Your sales rep will make sure all items that you want included in this program are web enabled.
- Once all items are web enabled, we will start to print labels.
- When labels are ready, the Mars sales rep can come and label your cabinet/shelves/storage. However, if you prefer, this process can be done by your team.
 - *Labels don't have to be put in the cabinet/shelves/storage. Some prefer using a laminated binder arranged by product type. We are flexible and will work with you.*
- When the labeling process is complete, our Marketing/Ecommerce Manager will deliver the iPad and scanner and conduct training for whomever is responsible for placing orders. If you are lucky, he might bring donuts.

Tool Cabinet Requirement (* from page 1)

If certain requirements are met, Mars Supply offers a new storage cabinet(s) option. Please discuss this opportunity with your Mars sales rep if you are interested in having new cabinets provided. Customers utilize this benefit for several reasons -- their cabinets may be old and ready for replacement or business is growing and need additional storage for tools.
