

Standard and Special Indexable Tool Repair

The cost of repair is generally less than 50% of new replacement cost. Because pricing is based on the amount of damage, customers often save 70% or more versus buying new.

Indexable Cutting Tools:

- Milling Cutters
- Drills
- Boring Bars
- Toolholders
- Endmills
- Quick-Change Tooling
 - *KM*
 - *Capto*
 - *HSK*
 - *Any many more*
- Any Tool with a Replaceable Insert Pocket
- All Brands
- Specials / Standards

Q3 Quality Control

Carbide Tool Services, Inc. is the only indexable tool repair company in the country that has achieved ISO 9001:2015 certification. This achievement, along with their exclusive Q3 quality process, separates them from others in the indexable tool repair market.

The ISO 9001:2015 standards fit cohesively with our exclusive Q3 process. The idea behind Q3 is to inspect and document specifications throughout the tool repair process, as well as integrate an independent inspection department. The synergy of the two programs insures that all tooling is repaired and inspected to the original specifications.
